

SYMPTOMS OF COVID-19

PARENT / STUDENT SCREENER

Parents, please check your student daily for any of the following symptoms.

DO NOT have your student come to the school if they exhibit:

Any of the following:

- Fever (temperature of 100.4 degrees Fahrenheit or greater)
- New uncontrolled cough that causes difficulty with breathing and/or shortness of breath (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Recent loss of smell or taste

OR 2 or more of the following:

- Chills or shivering
- Sore throat
- Fatigue (unusual)
- Muscle pain (unexplained)
- Onset of severe headache, especially with fever (new or not typical)
- GI upset (diarrhea, vomiting, nausea, abdominal pain)
- Congestion/Runny nose

**If your student has symptoms of COVID-19,
please keep student at home and contact your health care provider
or call the COVID hotline at 1-866-443-2584 for direction on next steps.**

Also, a student should not come to school if:

- They or anyone in your household tested positive for COVID-19 within the previous 10 days
- They or anyone in the household is waiting for the results of a COVID-19 test
- They had close contact with a person with confirmed COVID-19 (within 6 feet of an infected person for at least 15 minutes) the previous 14 days – check with school regarding this as can vary depending on the circumstances.
- There is someone in their household who is identified as a “close contact to a confirmed case” and is exhibiting symptoms (been instructed to self-quarantine).
If “close contact” does not have symptoms, the student should attend school.
- **NOTE: If the student is vaccinated, as long as they are symptom-free and have not tested positive, they may attend school and do not need to quarantine.**

**By sending your student to school, you are verifying that your student does NOT
have any symptoms of COVID-19 and has NOT been in contact
with someone who has tested positive for COVID-19.**
